

HARROW & PIKE VALUATION SERVICES

Net Orderly Liquidation Value Appraisal · Cascade Outdoor Brands Inc. · Field work completed 12 August 2026

SCOPE

Harrow & Pike was engaged to estimate the net orderly liquidation value of the subject inventory. Field work comprised a physical test count at the Bend, Oregon facility, review of the perpetual inventory records at 31 July 2026, and analysis of comparable disposition results for technical outerwear.

CONCLUSION

CATEGORY	COST BASIS	RECOVERY	NOLV
Raw materials	3,500,000	32%	1,120,000
Work in progress	2,100,000	18%	378,000
Finished goods, current season	6,300,000	82%	5,166,000
Finished goods, prior season	2,100,000	69%	1,449,000
Total	14,000,000		8,120,000

OBSERVATIONS

Recovery on current-season finished goods is strong and reflects an established wholesale channel that would absorb inventory in an orderly wind-down. Work in progress recovers poorly, as partially assembled garments have limited value outside the applicant's own production process.

The subject inventory is not perishable and has no expiry dating. Storage requirements are ordinary dry warehouse.

Costs of sale, including commission, transport and holding costs, have been deducted in arriving at the net figures above.
